

HI, GUYS! I'M FROGGIE,
THE ERASMUS GREEN
AMBASSADOR OF THE
CAMPUS.

HAVE YOU HEARD ABOUT GREEN ERASMUS?

Implementing environmentally sustainable and responsible behaviour in mobility programmes and in internationalisation in general is a key concept in the 2021–2027 programme cycle.

We are all invited and encouraged to lower the negative impacts of international mobility on the environment, namely, to minimise our ecological footprint related to greenhouse gas (GHG) emissions as a consequence of travelling by plane, and to turn digital in all administrative processes (Erasmus Without Paper).

Let's unite our forces to introduce environmentalfriendly practices and to tackle climate changing challenges.

THE TREASURE WE HAVE...

Our campus is located in a huge park, in beautiful natural environment. All is green. Let's take care of it together to keep it safe for the long run. You are welcome here and invited to join us in our green efforts to become the greenest campus in Hungary.

WHAT HAVE WE ACHIEVED SO FAR?

Composting green waste

Collection of batteries

Use of led-lighted lamps where possible

Use of recycled materials

Digitalisation in administrative and study affairs to avoid printing

Double-sided printing if needed

Outdoor bicycle-keeping stands

Filling station for electric bicycles

Pick-it-yourself actions (volunteer clean-up around the buildings)

Pressing machines for pet plastic bottles

Collecting plastic bottle caps

Creating separate waste islands

Use of solar collectors for heating in some of the buildings

Use of thermal water to provide hot running water in the dorms

Use of energy-saving refrigerators and washing machines

COME AND BE PART OF GREEN ERASMUS IN MISKOLC! HOW?

Take another means of transport instead of a plane when coming here (if possible)

Don't throw away garbage

Always put the garbage and batteries in the selective cans

Avoid the wasteful use of water and electricity

Take part in volunteer cleaning or flowerplanting actions

Use online tools instead of paper-based in studies and everyday life

Avoid using one-time or disposable plastic things

Use your own cup instead of a disposable one when buying coffee from a machine

Take a train when travelling to another town or country from Miskolc

Anything else we haven't mentioned?

Your own green ideas and contribution to
Green Erasmus will be appreciated.

ARE YOU CURIOUS TO KNOW HOW BIG YOUR CARBON FOOTPRINT IS IN TERMS OF TRAVELLING?
