

The Quality Assurance Centre of the University of Miskolc

will launch its newsletter starting October 2024.

We aim to inform the staff and students of the University of Miskolc about the activities of the Centre and the work done by our staff.

QUALITY

Our goal is to inform you about our activities to strengthen quality awareness. We focus primarily on accreditation, and in preparation for it, we summarise the most important quality-related information for you. We will show you our surveys and their main results. With these, we contribute to the compilation of the institution's new Institutional Development Strategy for the period 2025-30. We try to be simple, understandable and concise.

The Quality Assurance Center started operation on 1 May 1 2023 as an independent management unit under the direct control of the rector and the economic manager. Currently four people perform its tasks.

Quality assurance and improvement of university operations in all areas – be it teaching, research or any service (student, administrative, financial, etc.) or activity that ensures the smooth performance of tasks (e.g. maintenance) – is carried out jointly with us. This includes the performance of accreditation-related tasks and continuous quality improvement through the PDCA ("plan-do-check-act") cycle. This is why, for example, the various surveys keep coming up again and again. We coordinate and support the quality assurance activities of the Faculties, as there are some tasks that have to be carried out by all of them according to the same principles and methodology.
